

Back to the future

The history of Russia known and documentary to some extent totals about 1200. The first political and military heads ancient Russian were elected democratic way and national voting varyags Rurik, Sineus, Tuavor. Probably, Rurik was northern Slav, Sineus from an average strip of Russia, and Tuavor from the bottom Volga region or Northern Caucasus.

The world history has been carefully cleaned by Puritan sectarians and alchemists about 500 years ago. The most authentic represent Histories of Russia and Japan. Documents and chronicles of other countries look rather doubtful though also the History of Russia is a by-product of Puritan historians.

I shall take on myself boldness to assert, that the center of origin of a modern civilization is the Volga region and Caucasus. For the proof of the given thesis there is no necessity more to break spears in useless disputes. Puritans have made the big mistake when have enabled to develop to genetics. The genetics absolute also will irrevocably prove, that all modern people western and the most part of east civilizations take the beginning in Russia. Russia was the wave center of a planet the Earth, streams of tribes and peoples, which have mastered open spaces of Russia, East, Northern and Western Europe, the Near East and Central Asia, Then the Far East whence proceeded. Then waves have proceeded and have reached America, Australia.

Foam of these waves has born in New Light in 17 century of puritans - sectarians which within 500 years conducted continuous from time to time latent, and sometimes obvious war for world supremacy. The beginning of 21 centuries has met a planet a celebration of practically won secret community of puritans from the USA and the Great Britain. With disorder of the USSR and economic crash of Russia puritans have decided, that it is more them to be afraid there is nothing, and have overlooked about centuries of conspiracy, the traditions and care. They have made a fatal mistake, now we know, who they and that want. Thanks cowboys the daddy and son Bushes with stepson Ben Laden, and also Toni Blair let will tell. Cards are open.

All world was confident, that the most democratic power in the world the USA copes nationally elected President, instead of less democratic power Great Britain is under home nursing of Queen and Prime-minister - Minister. And actually Presidents and Prime-minister - Ministers as dolls - puppets operate Prince of Puritans. Democracy and liberalism of such state system is a bluff and a screen of medieval superstitions and mystifications. Having listened to opinion of people, these leaders of the largest powers of the world go cap in hand to the confessors and, having received orders, notify other world, that God has told him to make so or so. **Prince of Puritans it not God Almighty.**

Nevertheless, the North Atlantic Union of puritans the USA and the Great Britain for last centuries has transformed the USA into the richest country of a planet. All world today has declined knees with hunting or hatred before these sectarians. We shall note, that 99,9 % of the population the USA and to them of the attitude have no Great Britain. Last centuries connected concept of progress with the USA. Progress in this understanding has ended.

RUBICON IS GONE

There has come time not victories, and global defeat of sectarians - puritans on all fronts of medieval war. Epoch Водолея has entered the rights. In only one it will be difficult to compete with the USA are money. They will stay for a long time the richest and prospering country in the world, and all right. Dollars not the most important property of mankind. The USA have constructed the most extensive society of consumers.

Consumers except for work and purchases for the received dollars of material means in compliance with a rank and the class are able nothing and, the main thing, do not want.

In this connection, the USA and the Great Britain last 80 years carry out the continuous company on attraction in the country of foreign brains, and as sportsmen. Heads are necessary for them for development of a science and techniques, culture. Sportsmen for peace rivalry with other world on arenas. Our big and strong puritans have one lack. They suffer megalomania. We can understand this nuance. They Nation Redeemer, race Super Mans, righteous persons on that and this light. As it is touching to observe in news beautiful tablets about Nobel Prizes on a science and techniques: winners from the USA of 40 %, from the Great Britain of 30 %, and other world of 30 %. That "Americans" and "Englishmen" have a foreign origin, naturally, have overlooked. Such as American scientific - German Jew Einstein.

The manner of puritans has special refinement to make advances to Negroid or « Afro - Americans » or « Anglo - Africans ». The scientific term « Negroid the race » has already offensive character. If the person was born Russian or the African should be proud of it, instead of suffer from a complex not full value. Puritans many centuries maintained in the merciless image millions Negroid as slaves or a cheap labor. For smoothing protests and discontent they indulge them now in all. Having looked original MTV from London, we shall notice, that 70 % of time borrow clips of completely not white puritans. The same picture and in the USA.

Similar situation in the world of sports. For domination in the world championships and Olympic games the USA involve not less than 70 % Afro the American sportsmen. In due time there were even offers to divide competition to a racial attribute since Africans have structure of a muscular fabric distinct from other races. But it smelt slightly of racism. We for equality of races and nationalities. Participation of the American sportsmen on forthcoming Olympiad in Greece in doubt. Jacobs for safety reasons. It is thought, Puritan technologists have considered, that this time they can concede command superiority to sportsmen from Russia and the Slavic countries, therefore easier not go, than be dishonored.

The main problem for Russia to construct a society of free people. A society of managers, businessmen, scientifically - technical and creative intelligence. Main our achievements: freedom and education. Freedom and education should release consciousness of Russian people from centuries-old deposits of obscurantism of sectarians, relieve of the complex of the nation imposed from the outside lazy дурачков. She is a propaganda duck of puritans. Freedom should be based on concepts of orthodox democracy, and education on our Russian training with rich centuries-old traditions. Other prominent aspect is development of mass and professional sports. We should and we shall beat on sports these arenas Atlantic Super Mans. Without dependence from a racial accessory. And not because we malicious. So the world from time immemorial is arranged.

Let's return to a history. Something is lost irrevocably in fires of inquisition and libraries of puritans. But now the world is open for all. The new researches of historians released from a veil shop of puritans and supported by modern tool means, will restore real events of last centuries. Waves of immigration from Russia medieval and modern have stopped. If they to proceed, Russia will die. People together with it. All vectors of world development were устремлены in the USA. The One Polar world is impossible in our universe. There is plus and a minus. It is a basis of a universe. There was a saturation in minus area and who is necessary to be determined we, whence and where to go further.

Aia-Sofia (Temple of Sofia) in Istanbul has been constructed according to official chronicles of puritans in 532-537 architects Anifiy from Trall and Isidor from Miletus. Vaults of a temple are decorated with mosaics of 6-12 centuries. It is considered a monument of architecture of the Byzantine Empire. Who was in the Temple of Sofia, that will be surprised. How it was possible to construct the biggest cult building on a planet in Middle Ages of

all for five years? Even now it is practically impossible. And then to paint with vaults of 600 years. We shall notice, that any conquerors did not destroy grandiose religious constructions punish peoples.

The temple of Sofia in Istanbul is lost in centuries and chronicles Temple Соломона. The Israeli Jerusalem is a sacred place of Christians, Moslems and Jews. But he it is artificial it is created in 19 century at participation of our Russian Jews and their volunteer assistants - puritans. Jerusalem modern is that it is. Former Arabian village Al - Kadus.

Temple Solomon in Istanbul (the Temple of Sofia) should become that place where and religions of Europe and Asia begin to coexist and respect peoples peacefully each other. Orthodox, Moslems and Judies. If Catholics to join us, thank God. For political realization of this religious consent it is necessary to create Euro Asian Union. Controls of the union should settle down on the sacred ground of Istanbul. Union should be democratic formation of the independent states. Main task Union - democratic counteraction to domination of puritans on the Earth and development of a traditional civilization worldwide. In this idealized project the central place should belong to Russia as to a real nuclear power, which can protect democratic values on all planet with the help, naturally, any political, religious and military allies.

The Russian ground all history of mankind allowed pulses for expansion of peoples and tribes to the novel grounds and the seas. Today the Earth is mastered practically completely. It is necessary to adjust only a worthy and full life to inhabitants of a planet.

Russia should mobilize the population on a creative impulse and new revolution in a science and technical equipment. To release consciousness of people. To stop cycling on accumulation of the capital, let puritans are engaged in it. The information on the nature both the future techniques and technologies are among us. It is necessary to understand and take her from an environment, space. It is necessary to found the State Premiums, for example on 1 billion rubles, for a presence of technical decisions in the field of thermonuclear technologies, it is possible cold thermonuclear, otherwise our country will freeze years through 20-30 when oil and gas will end. Premiums are necessary also for ideas in the field of management of gravitation, time, space, a presence of new principles of movement in a space.

There has come time of development of Deep Space. With existing technologies it is dangerous to fly even to Mars. In case of emergencies it will be impossible to carry out operations for rescue of crew. Russian and foreign scientists should think and offer continuously new ideas, which will deduce our democratic civilization on expansion to Deep Space. We shall return from Space not one. Time has come.

Progress will be connected to Russia and our allies for many centuries.
